

Directory Form Binder

Definition

The **Directory Form Binder** allows one to interact with the Directory Manager.

Configure Directory Form Binder

Edit Form > Advanced > Configure Directory Form Binder > Field Mapping (User)

Type

User

User

Group

Organization

Department

Grade

Figure 1: Directory Form Binder Properties

Name	Description
Type	Entity type that you would like to write/read.

!

What's next?

After making the selection above, relevant entity attributes mapping will show up. All attributes need to be mapped to the form fields accordingly. Form field ID is expected in all the fields.
