

List

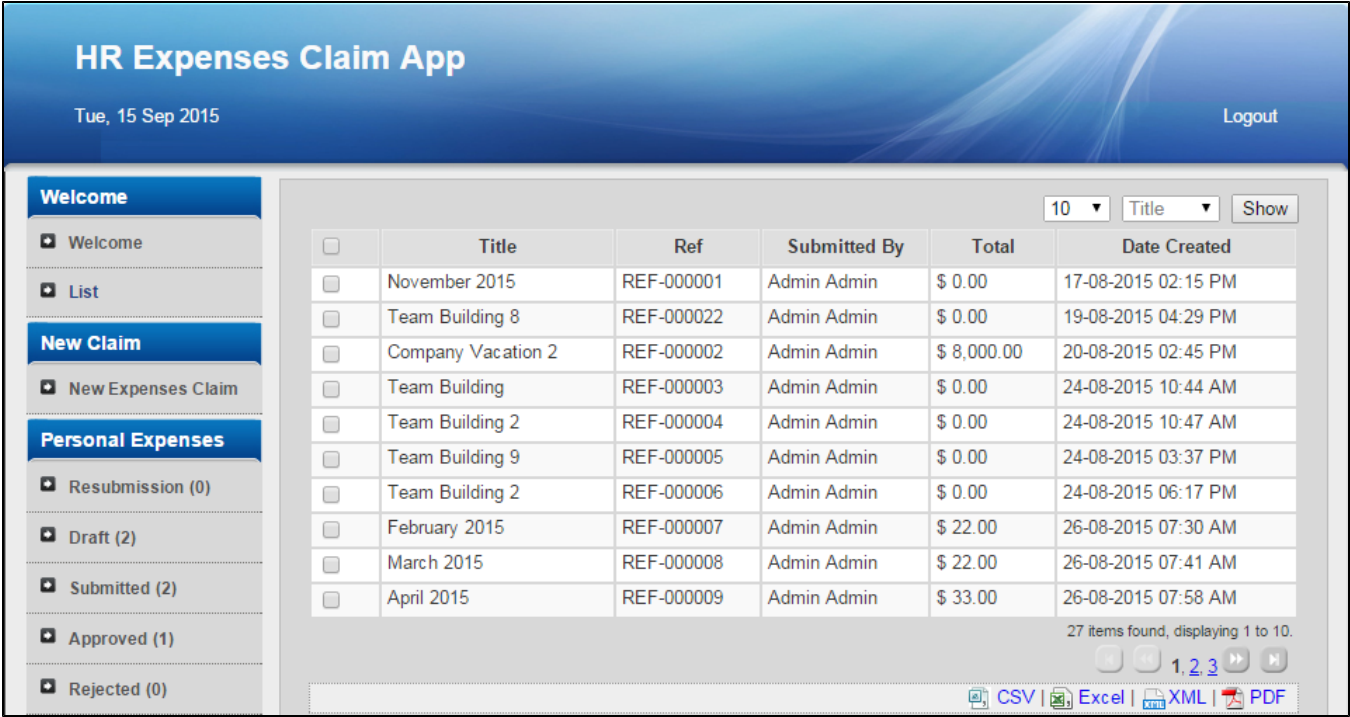

Definition

List allows one to integrate Datalist created using the [Datalist Builder](#) into the Userview.

Performance

You can configure the **Performance** settings in this Userview Element to cache existing content for improved performance and loading speed.

Read more at [Performance Improvement with Userview Caching](#).

Userview
Key
Name

This value should correspond to existing datalist's column name. When set, the datalist will be filtered using the userview key value.

Example

Userview Key Name: claimant
