Completed Process Instance

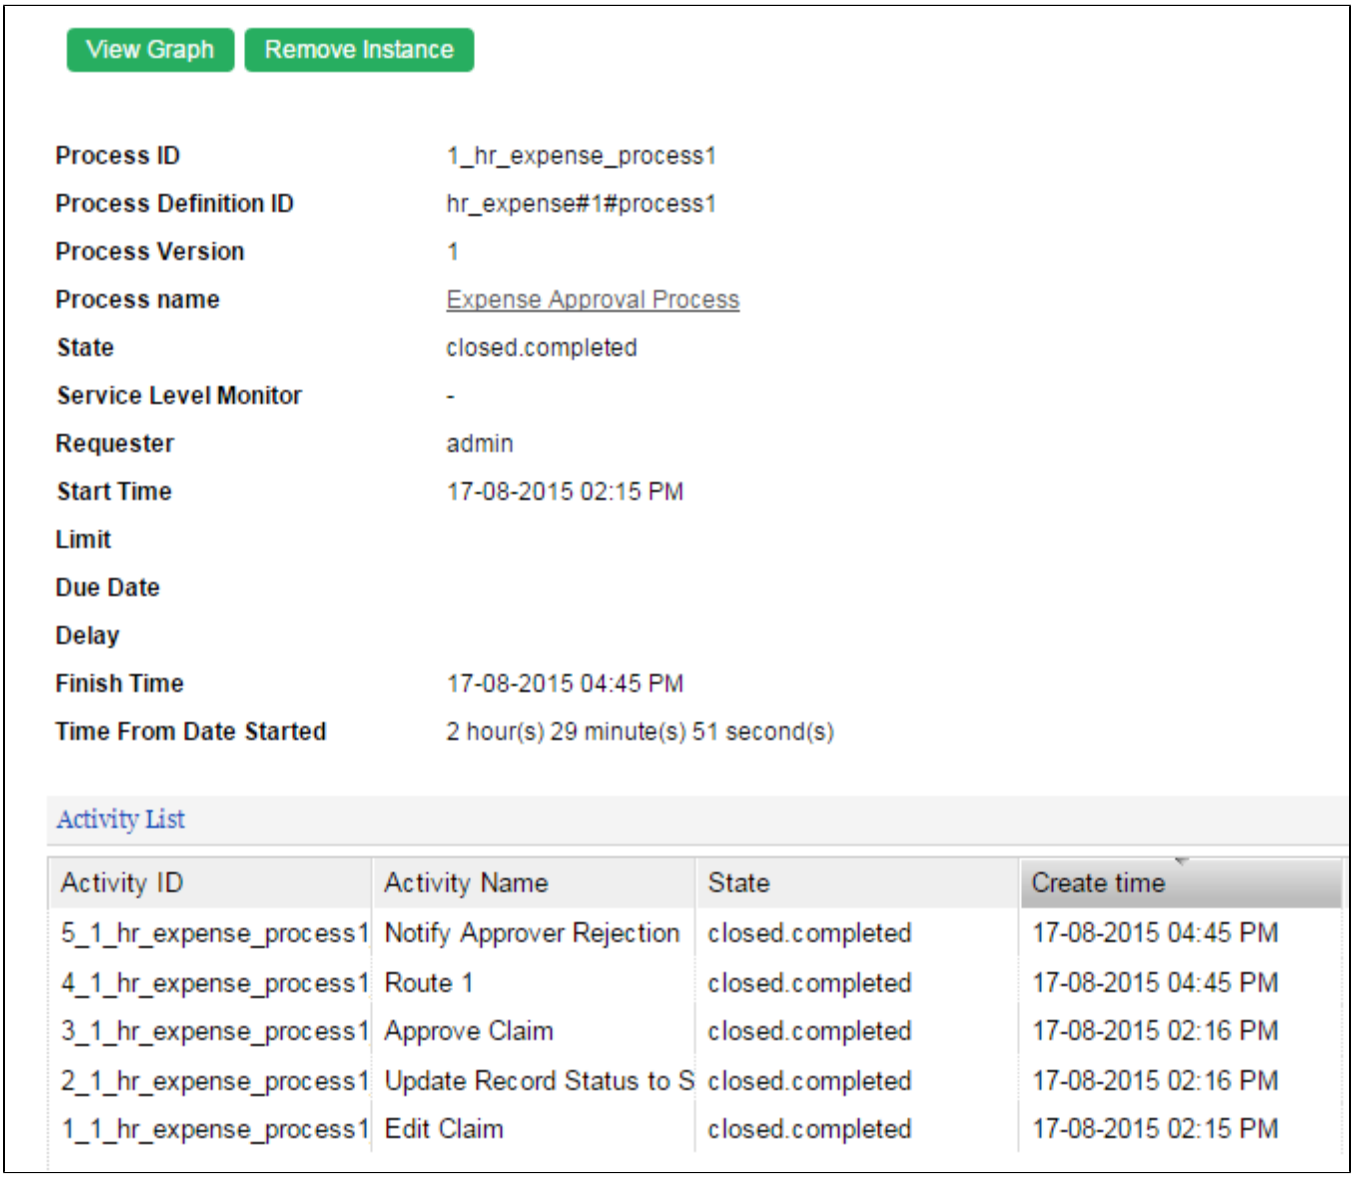

Figure 1: Viewing a Completed Process Instance

In this view, one can see the state, statistical data and the activity list of a particular process instance. In the activity list, one can click on a specific item to view the activity instance's information. (See Completed Activity Instance)

Actions that the administrator can perform on the process instance:

- **View Graph**
  Displays the workflow diagram
- **Remove Instance**
  Permanently deletes the process instance; process data will be removed as well
