Process Data Collector

> **Process Data Collector** can be enabled at the App's level to allow SLA information to be gathered for statistical and analytic purpose.

You may enable the **Process Data Collector** plugin in your app's Plugin Default Properties.

Go to **Properties & Export** > **Set Plugin Default Properties** -> Choose **Process Data Collector** -> **Submit.**

> **ⓘ** What to configure?
>
>   There is no further configuration needed after the submission.

Once enabled, data will be written into **app_report_*** tables in your Joget database.
