

- MySQL

-
-
- Joget Workflow
-

```
CREATE TABLE IF NOT EXISTS `app_fd_demo` (  
  `id` varchar(255) NOT NULL,  
  `dateCreated` datetime DEFAULT NULL,  
  `dateModified` datetime DEFAULT NULL,  
  `c_message` longtext,  
  PRIMARY KEY (`id`)  
)
```

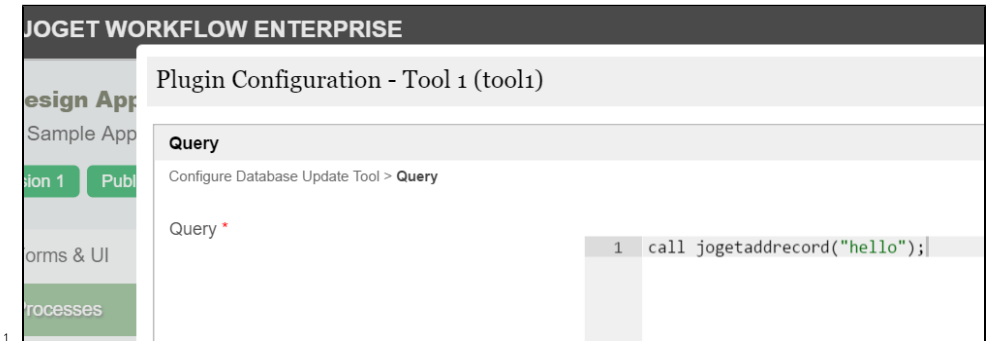

SQLJogetaddrecord

app_fd_demo

```
DELIMITER //  
CREATE PROCEDURE jogetaddrecord(IN inputParam VARCHAR(255))  
BEGIN  
  INSERT INTO app_fd_demo VALUES (now(), now(), now(), inputParam);  
END //  
DELIMITER ;
```

Joget Workflow

1. Joget WorkflowProcess
- 2.

```
call jogetaddrecord("hello");
```

```
mysql> select * from app_fd_demo;
```

```
