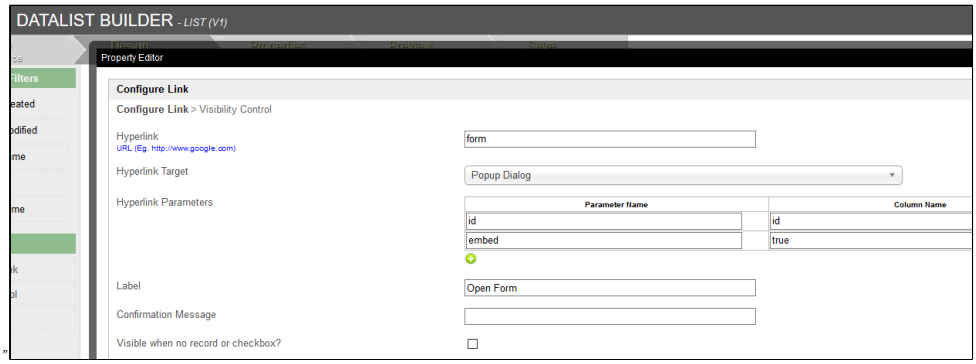
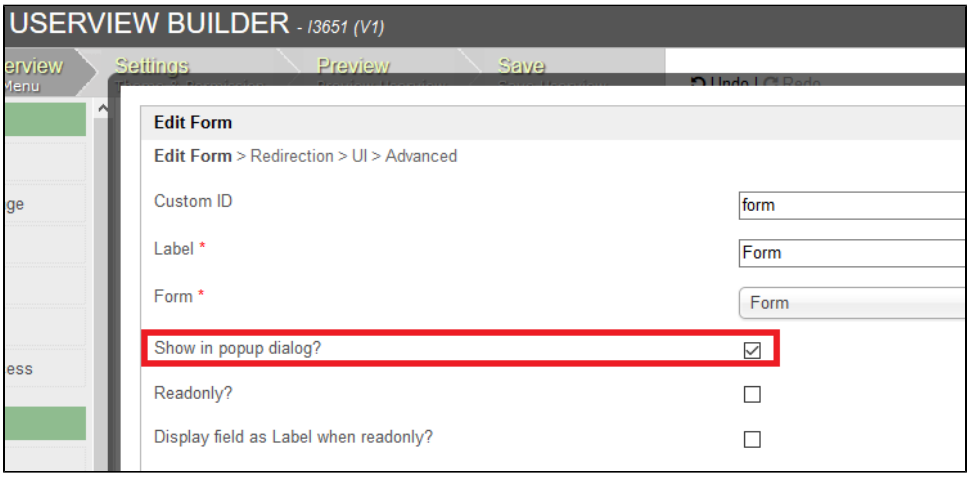
Userview2ListForm

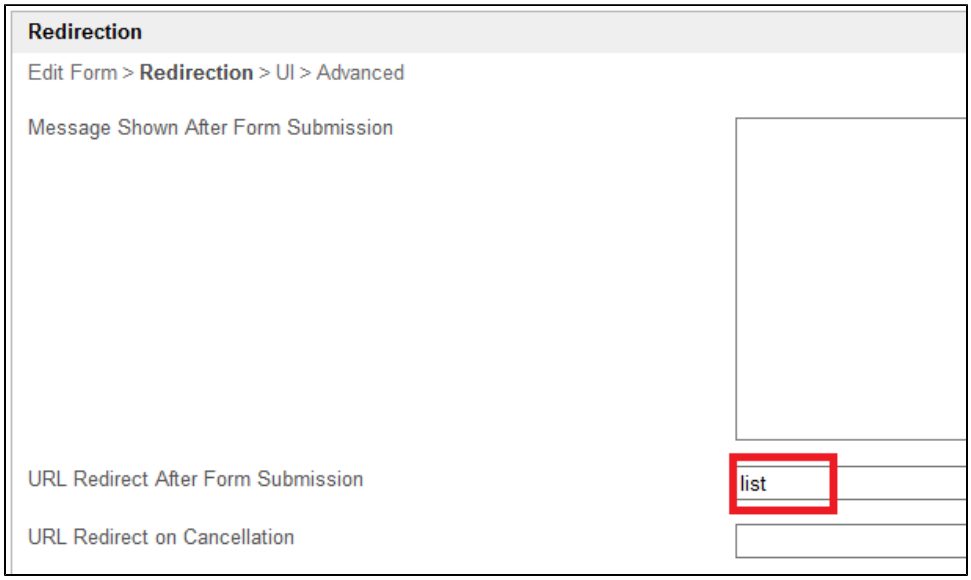
:



1. DatalistUserView Form“form”“embed = true”“”“”
2. “ ”



3. “URL”



Doing the same to Inbox assignment

“ > UI” “

```
<p>
<script type="text/javascript">// <![CDATA[
$(function(){
         if(window.top!==window.self)
              parent.window.location.replace(parent.window.location.href);
         })
// ]]></script>
</p>
```
