Dashboard

Definition

Dashboard menu displays multiple menu items from the selected Userview in a resizable grid layout.

New Feature

This is a new feature in Joget Workflow v6.

Performance

You can configure the **Performance** settings in this Userview Element to cache existing content for improved performance and loading speed.

Read more at Performance Improvement with Userview Caching.

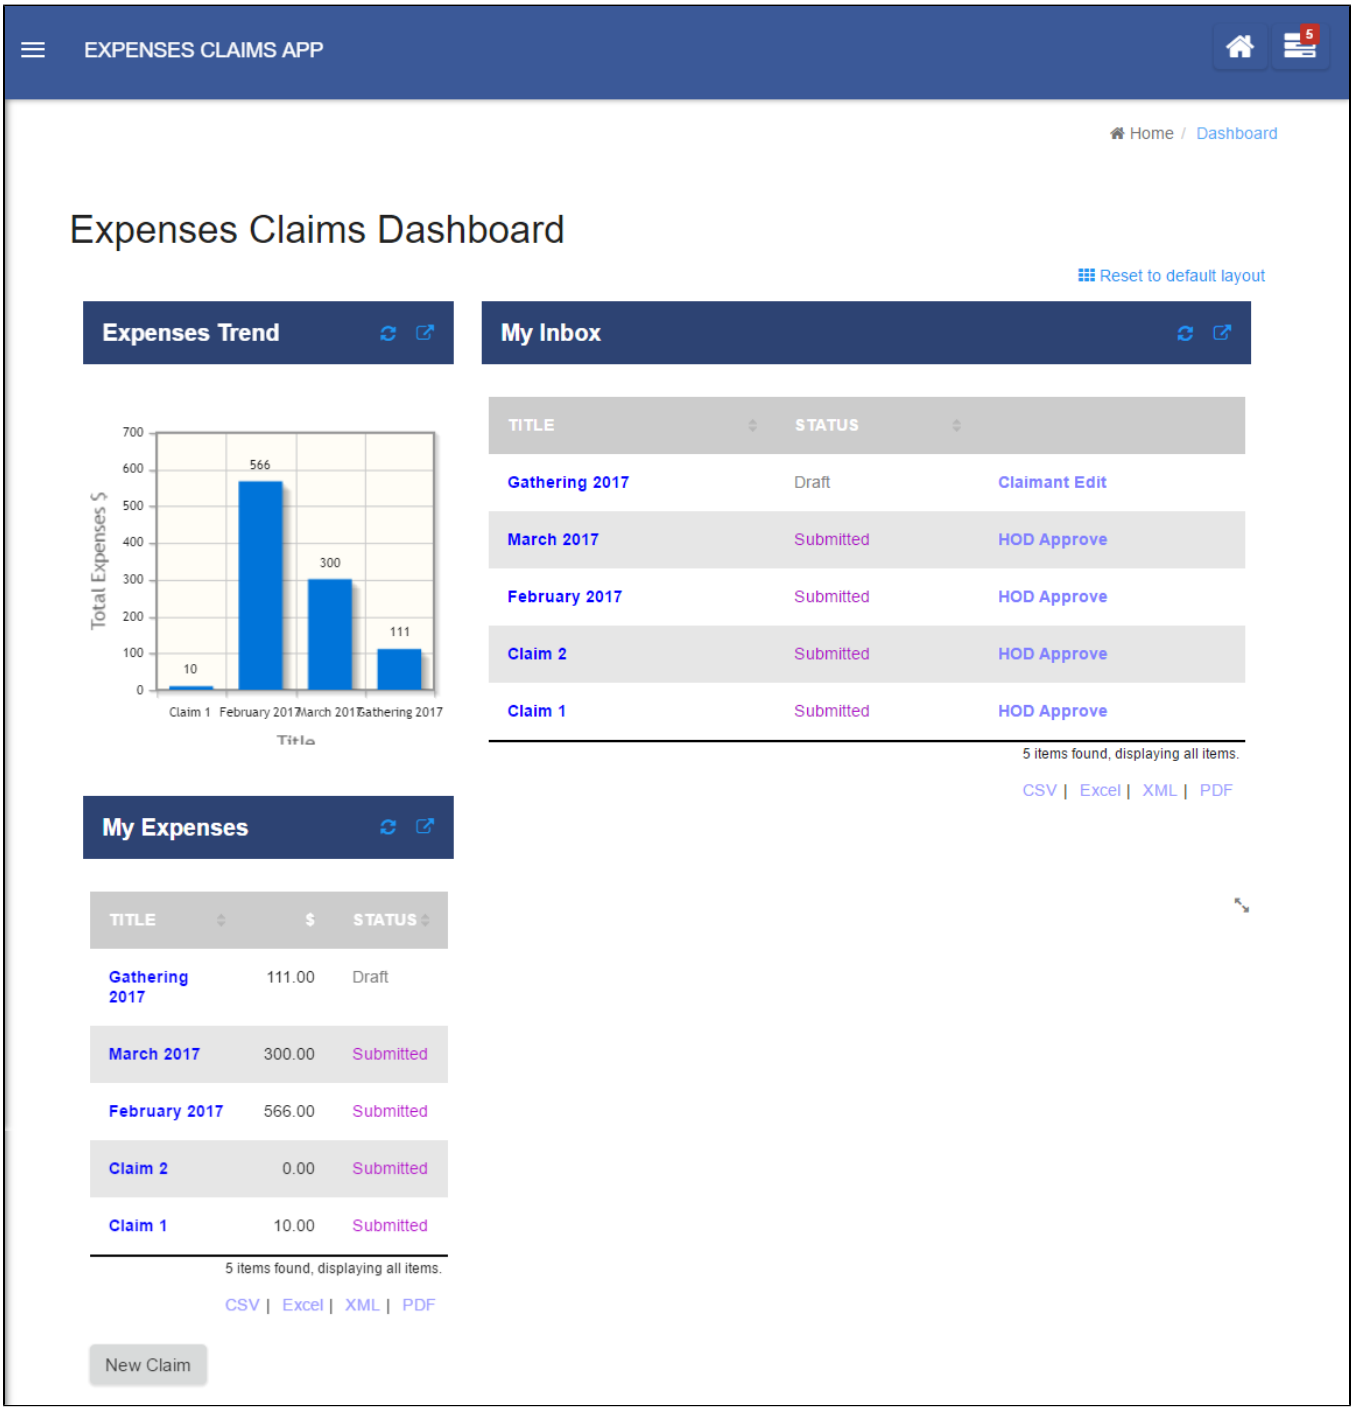

Figure 1: Dashboard Menu

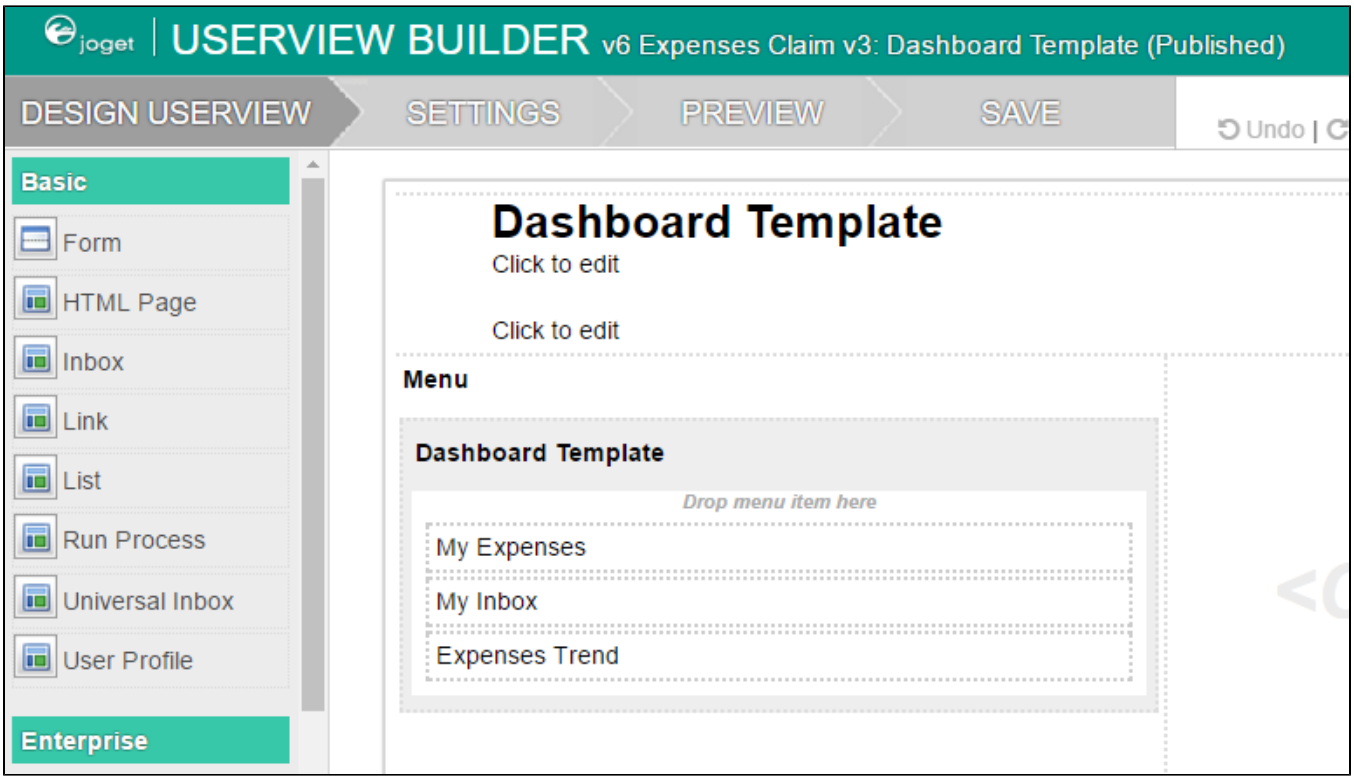

Figure 2: Userview containing menu items meant for the Dashboard userview

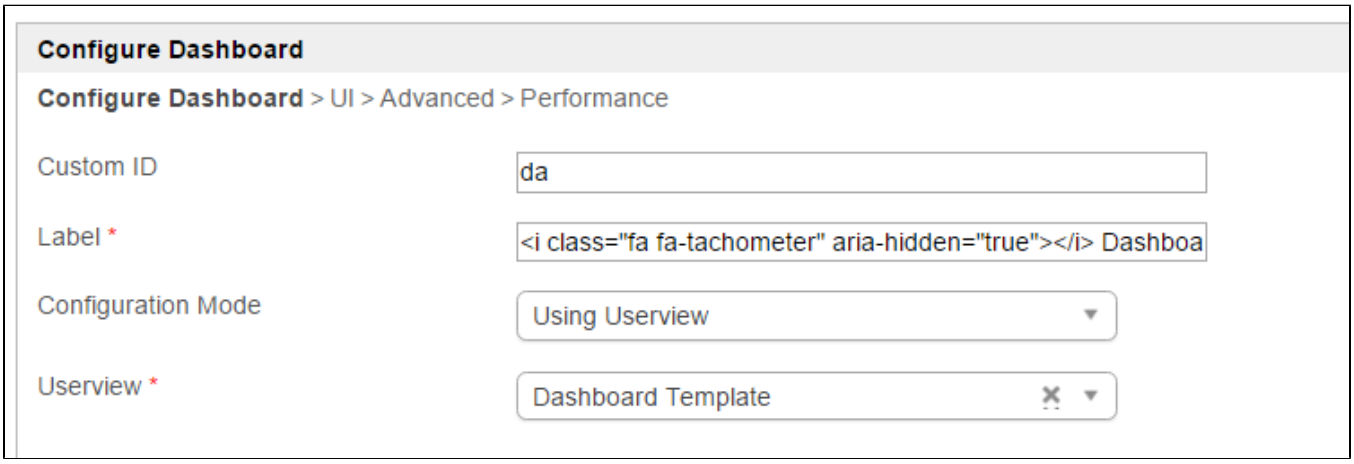

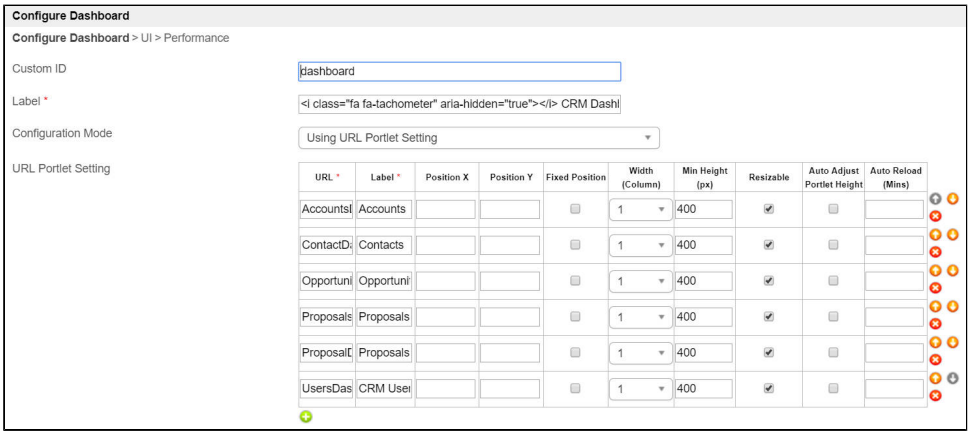

Figure 3: Properties - General

Name	Description
Custom ID	Item link slug. Optional field. **Unique field** Value defined here must be unique to the rest of the Userview Menus as the first matching name will be called upon.
Label	ชื่อเมนู ฟิลด์บังคับ

Configuration Mode	• ○ Using Useview ■ Userview will need to be selected (See screenshot **Figure 3** above) ■ See an example on the use of Userview Setting in the Expenses Claim app bundled in Joget Marketplace. • Using URL Portlet Setting ○ You may configure the path and settings to each portlet. ○ See an example on the use of URL Portlet Setting in the Customer Relationship Management app bundled in Joget Workflow Enterprise v6. ○ 

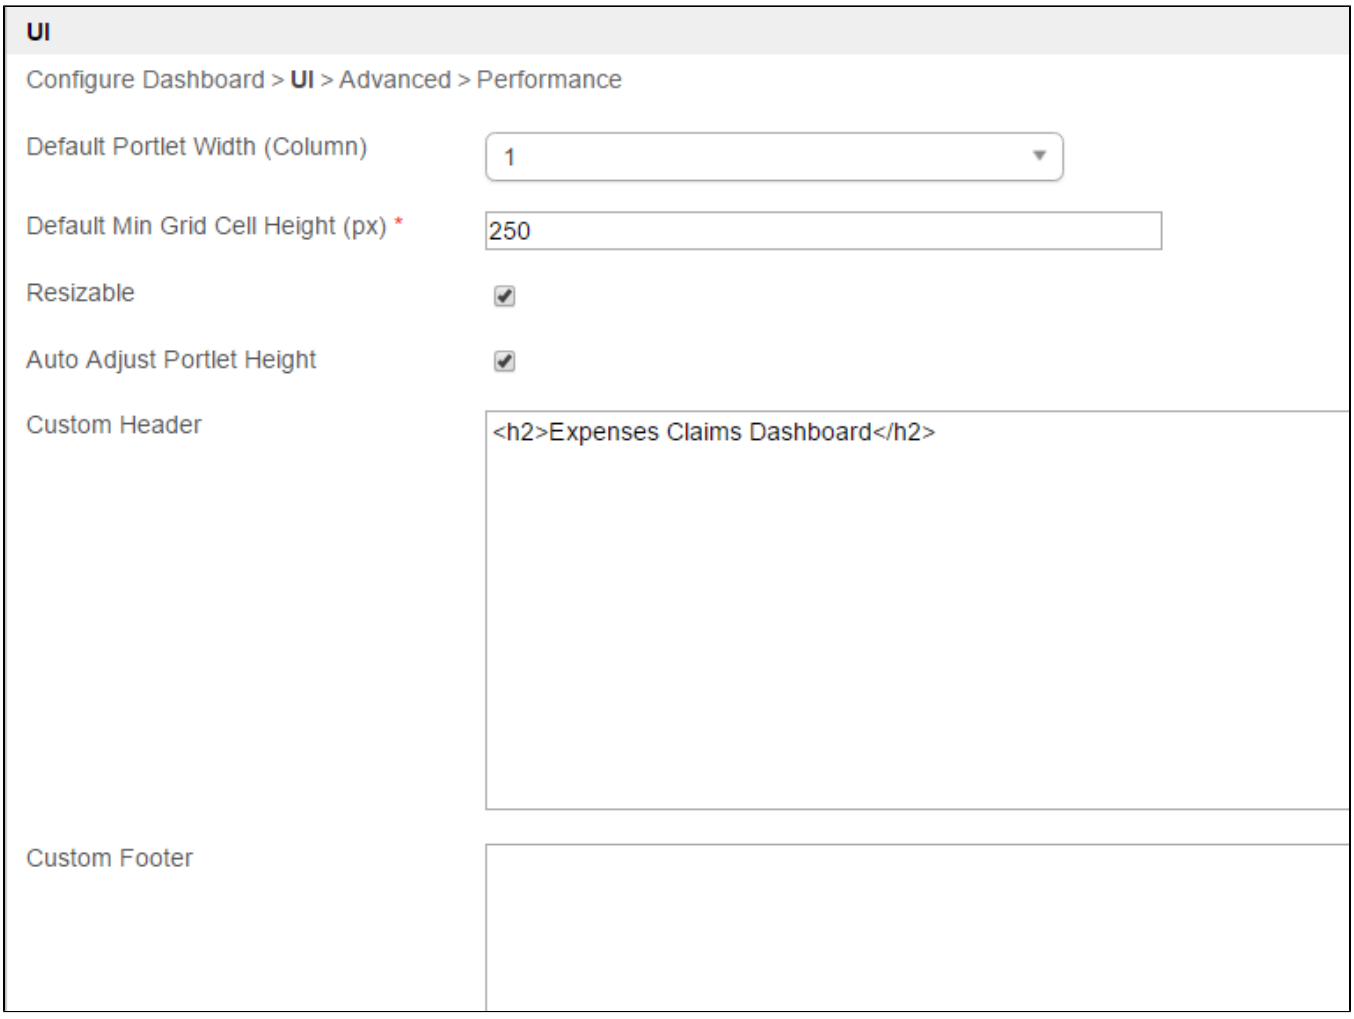

Figure 4: Properties - UI

Name	Description
Default Portlet Width (Column)	Number of columns to show by default.
Default Min Grid Cell Height (px)	Minimum height for each portlet.
Resizable	Determines whether end user should be able to resize the portlets.
Auto Adjust Portlet Height	When checked, portlet height will be automatically adjusted optimally according to its content.
Custom Header	Custom HTML to be placed before the portlets.
Custom Footer	Custom HTML to be placed after the portlets.

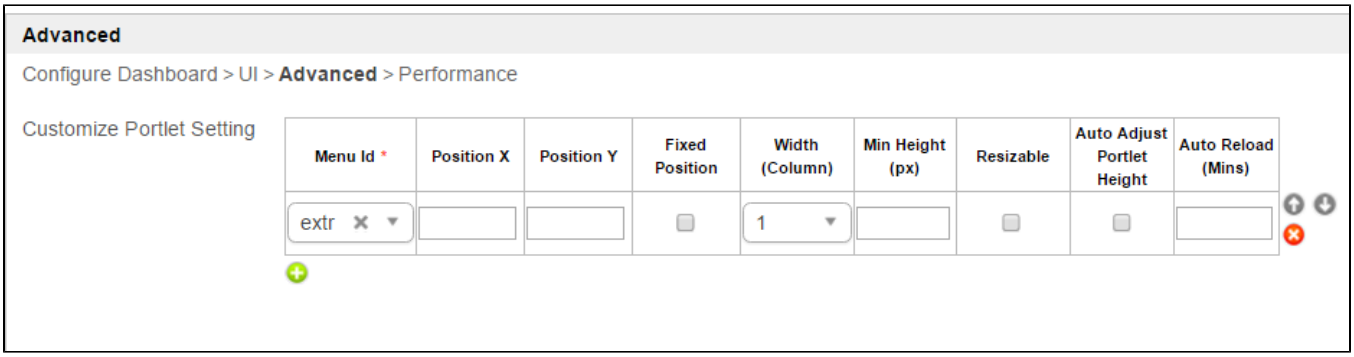

Figure 5: Properties - Advanced

Name	Description
Customize Portlet Setting	You can configure each of the portlet defined in the first tab here in terms of positioning, dimension, etc.
