""CRUD

"ID"

The screenshot shows the 'DATALIST BUILDER' interface for 'Booking App v1: List - Requests (Published)'. The 'Properties' tab is active, and the 'Property Editor' is open. The 'Configure Link' dialog box is displayed, showing the following configuration:

- Hyperlink:** `bookAppeal_crud?_mode=add` (highlighted with a red box)
- Hyperlink Target:** `New Window`
- Hyperlink Parameters:** A table with two columns: **Parameter Name** and **Column Name**. The first row has `applications` (highlighted with a red box) and `ID`.
- Label:** `Add to Form`
- Confirmation Message:** (Empty text box)
- Visible when no record or checkbox?:** ☐

2

"HTML"

The screenshot shows the 'FORM BUILDER' interface for 'Booking App v1: Book Appeal (Published)'. The 'Design Form' tab is active, and the 'Basic' section is selected in the left sidebar. The main form area displays a table with the following structure:

Appeal	
Applications	Meeting 1 Meeting 2 Meeting 3 Meeting 4

The text 'Drag This Column' is visible above the table. The 'CUSTOM HTML' button is located at the bottom right of the form area.

HTML

```
<script type="text/javascript">
    $(function(){
        var value = decodeURIComponent("#requestParam.applications#"); //replace with the parameter name you
declared in datalist action
        var values = value.split(';');
        $.each( values, function( index, value ){
            if(value != ""){
                $(FormUtil.getField("applications")).find("option[value='" + value + "']").attr('selected',
'selected'); //replace with the field ID of the select box in your form
            }
        });
        //$(FormUtil.getField("applications")).trigger("chosen:updated"); //enable this line if you are using
Multi Select Box, replace with the field ID of the select box in your form
    });
</script>
```
