

Map Participants to Users

Definition

Each participant declared in Process Designer would have its mapping configured here. There are various options available to define the participants.

Map Participants to Users

Map Activities to Forms

Map Tools to Plugins

Variable List

This is the list of participants defined in the Workflow design.

Claimant

ID : claimant

Type	Performer
Value	Activity Definition ID :runProcess
	Remove Mapping

Approver

ID : approver

Type	Performer's HOD
Value	Activity Definition ID :runProcess
	Remove Mapping

Finance

ID : finance

Type	User
Value	admin
	Remove Mapping

Process Start White List

ID : processStartWhiteList

Type	Role
Value	Everyone (Including Anonymous)

Figure 1: Map Participants to Users

Process Start White List

Process Start White List defines who is permitted to start the process. By default, everyone can start the process. But when configured, only those found in the mapping will be allowed to do so.

Mapping Options

Map to User or Group

Map Participants to Users - Claimant (claimant)

Map to User or Group

Map to Plugin

Map to Group

Map to User

Filter By Organization

Search

	Group ID	Group Name	Group Description	Organization
<input type="checkbox"/>	G-002	CxO		
<input type="checkbox"/>	G-003	hrAdmin		
<input type="checkbox"/>	G-001	Managers		

Figure 2: Map to User or Group

One may map a participant to a select user(s) or group(s). By doing so, every time a new activity is created in the participant's swimlane, Joget will pick up the same resultant user(s) to be assigned as assignee(s).

Inactive User

If the user mapped is **inactive** at the time of assignment is made, remember to delegate, re-assign, or change mapping and re-evaluate the assignment.

No valid user found?

If there's no valid user found to be assigned to at the time of assignment is made, the activity will be assigned to the current logged in user (previous performer).

Map to Org Chart

Map Participants to Users - Claimant (claimant)

Map to the Performer

Map to a Head of Department (HOD)

Map to an entire Department

Performer

Performer's HOD

Performer's HOD (Ignore Report To)

Performer's Subordinates

Performer's Department

Where the performer executed:

Previous Activity

Submit

Figure 2: Map to Org Chart

One may also map to a participant in relation to the reporting organization chart and the performers/participants in the process flow.

For example, we are trying to determine the participant that will be approving a claim. The person to approve a claim will be the HOD of the person that submitted the claim. Therefore, the setting would be **'Performer's HOD** where the performer executed **Submit Claim**"

Map to Workflow Variable

Map Participants to Users - Approver (approver)

Map to User or Group

Map to Workflow Variable
Map to Plugin

Variable ID approver ▼

The value of the Workflow Variable represents:

☒ Group Code
☐ Username
☐ Department Code
☐ Head of Department (Department Code)

[Submit](#)

Figure 3: Map to Workflow Variable

A participant can also be determined through the use of Workflow Variable. This is particularly useful when the participant is decided on-the-fly in the preceding activity with the value set into the Workflow Variable. If the variable value contains a username, then, the option to be set here would be **"Username"** with the correct **Variable ID** picked.
