Introduction

The **Signature** is a special element with canvas to collect the user's input by scribbling/sketching on it

Get Started

The easiest way to see how the Signature works are to create a new app. Here are the steps:

1. Start the **Joget Server** and open the **App Center**.
2. Log in as admin and click on the pencil icon on the **Expenses Claim** to open the **Design App**. (see Figure 1)

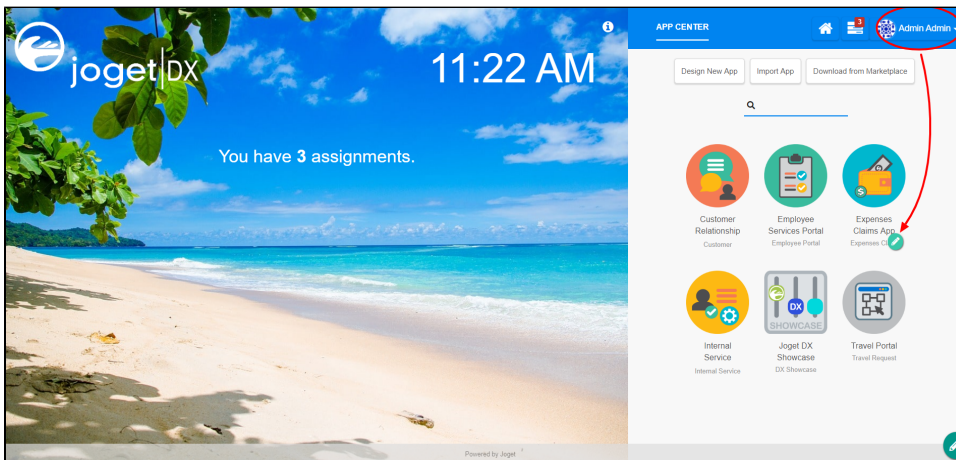

Figure 1

3. Click on the **Create New Form** button and fill up the Form Details as follows (see Figure 2):
 - a. Form ID: **signature**
 - b. Form Name: **Signature**
 - c. Table Name: **j_expense_claim**

4. Drag and drop a **Signature** element on to the canvas.
5. Click on **Preview**, and try drawing in the Signature field.

Signature properties

Edit Signature

Edit Signature ?

Edit Signature > Advanced Options

ID *signature

Label *Signature

Encryption☒

Name	Description
ID	Element ID (By declaring as "signature", a corresponding database table column "c_signature" will be created)

	<div>300px</div>
Readonly	Determines if the element is editable.
