Description

Figure 1: Edit Form Properties

| Name        | Description  |
|-------------|--|
| ID          | Form ID.   |
| Name        | Form name.   |
| Table Name  | Database table name. Maximum name is 20 characters. Joget will prefix "app_fd_" to the table name to create the actual table in database. For example, if you table name is "expense", the actual database table name is "app_fd_expense". |
| Description | Description of what the form intends to do. This is meant for developer/admin consumption only to describe the purpose of this element.  |
