Figure 1: Options Value Formatter Properties

Name	Description
Options	Options to be populated for the column value to be matched against.  Column value will be matched against "value" and "label" to be displayed to the end user.
Or Choose Options Binder	Options to be populated dynamically using <a href="#">Options Binder plugin</a> .  Available options binders: <ul style="list-style-type: none"><li>• <a href="#">Bean Shell Form Binder for Options Binder</a></li><li>• <a href="#">Default Form Options Binder</a></li><li>• <a href="#">Department Options Binder</a></li><li>• <a href="#">Grade Options Binder</a></li><li>• <a href="#">Group Options Binder</a></li><li>• <a href="#">JDBC Options Binder</a></li><li>• <a href="#">Organization Options Binder</a></li><li>• <a href="#">User Options Binder</a></li></ul> Configuring any options binder here will ignore 'Options' property values (if any).
