

Options Value Formatter

- [Introduction](#)
- [Options Value Formatter Properties](#)

Introduction

Options Value Formatter allows you to transform values on the datalist column into its corresponding option values and labels.

Options Value Formatter Properties

The screenshot shows a configuration dialog titled "Configure Options Value Formatter". At the top right is a checkbox labeled "Auto save when close?". Below the title, the path is shown as "General > Action Mapping > Formatter > Configure Options Value Formatter". The main area contains two sections: "Options" and "Or Choose Options Binder". The "Options" section features a table with columns "VALUE" and "LABEL", and a small green "+" icon below it. The "Or Choose Options Binder" section has a dropdown menu. At the bottom are navigation buttons "<< Prev" and "Next >">" on the left, and "OK" and "Cancel" on the right.

Figure 1: Options Value Formatter Properties

Name	Description
Options	Options to be populated for the column value to be matched against. Column value will be matched against "value" and "label" to be displayed to the end user.
Or Choose Options Binder	Options to be populated dynamically using Options Binder plugin .
