Dashboard Menu

Introduction

Dashboard menu displays multiple userview menus from the selected Userview in a resizable grid layout.

Dashboard Properties

Configure Dashboard

Figure 1: Dashboard Properties

Name	Description
id	Menu element unique id. Userview will use this id in the URL for the menu if the Custom ID is empty.
Custom ID	Item link slug. Optional field. **ⓘ Unique field** Ensure that value defined here is **unique** to other userview menus in the app, since the **first matching/conflicting ID** will take precedence in page loading.

|	
Label	The userview menu label. You can add Font Awesome Icons into your menu labels.
Configuration Mode	**Using Userview** ○ Userview will need to be selected. All the menus in the selected userview will be included as portlets in the dashboard. ○ See an example of this configuration in the default bundled *Expenses Claim app* in a default Joget installation. ○ Do **not** select the same userview where the dashboard menu is in. **Using URL Portlet Setting** ○ You may configure the path and settings to each portlet. ○ See an example of this configuration in the default bundled *Customer Relationship Management app* in a default Joget installation.

UI

Figure 3: UI Properties

Name	Description
Default Portlet Width (Column)	Number of columns to show by default.
Default Min Grid Cell Height (px)	Minimum height for each portlet.
Resizable	Determines whether end user should be able to resize the portlets.
Auto Adjust Portlet Height	When checked, portlet height will be automatically adjusted optimally according to its content.
Custom Header	Custom HTML to be placed before the portlets.
Custom Footer	Custom HTML to be placed after the portlets.

Advanced

Figure 4: Advanced Properties

	Description
Customize Portlet Setting	You can configure each of the portlet in terms of positioning, dimension, etc. Only applicable when "**Using Userview**" option for "**Configuration Mode**" field is selected.

Performance & Offline

Cache Settings

Name	Description
Scope	Caching options are: • **None**: No caching. • **Application**: Cache content by application where all users will see the same content. • **User**: Cache by username.
Duration (s)	Duration in seconds to cache content, defaults to 20 seconds if applicable.

Read more at Performance Improvement with Userview Caching.

PWA Offline Settings

Note: PWA Offline support is dependent on the theme used.

Name	Description
Enable cache for offline support	Enable caching for offline support, usually set for use on mobile browsers.

Read Progressive Web Application (PWA) for more information.
