Request App Protection

-

This article is applicable to app designers who want to distribute their Joget apps with app protection.
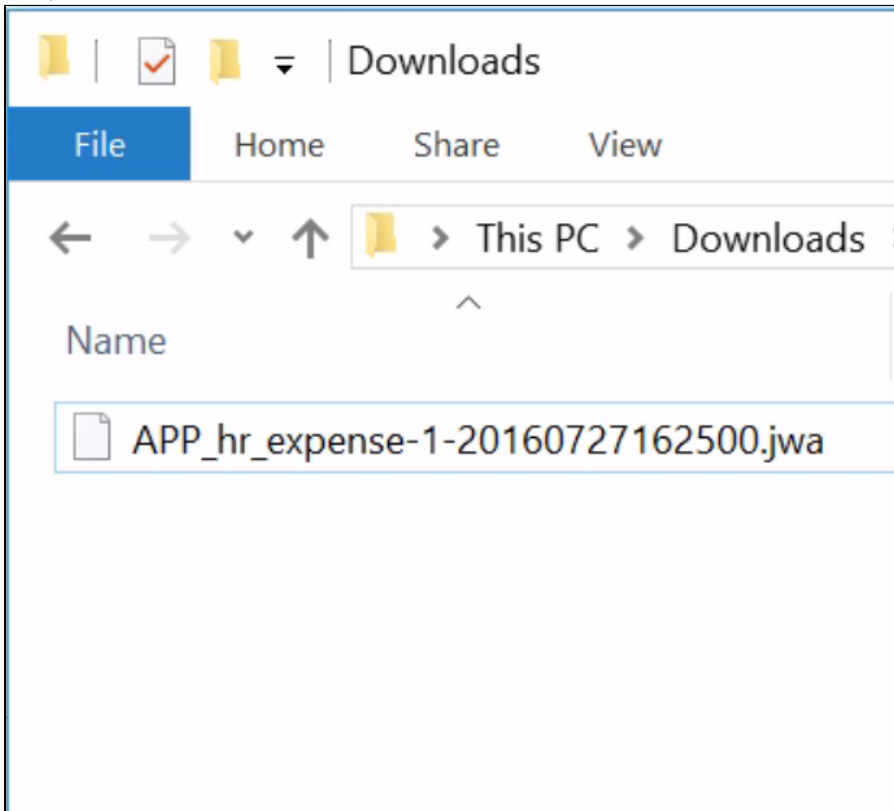

Instructions

1. Exporting the App

- From your Joget Workflow's App Center, go to your intended App's design.
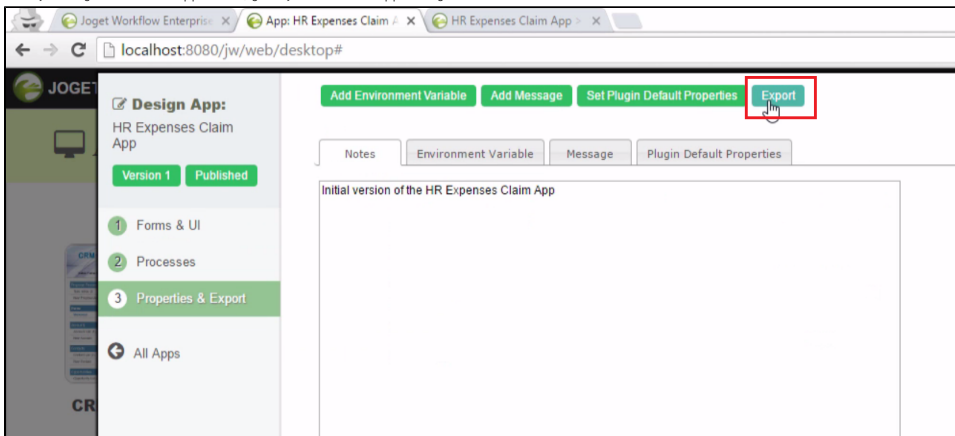

- Click on **Properties & Export**.
- Click **Export**. A .jwa file will be downloaded to your computer.

2. Request for App Protection

- Open your web browser, navigate to our [License Activation site here](#).
- Click on **Request for App Protection**.

- Fill up all the fields in "Description" using this template, attach the exported app jwa file in "Files" and submit.

Template
| ```
App ID (Mandatory)      :

App Title (Mandatory) :

App Description         :

Requires Activation? (Tied to system) : Yes / No
``` |

- You will receive an email containing further instructions.
