

# Directory Manager

## Introduction

You may override Joget's built-in directory manager with this **Directory Manager** plugin. Use the Directory Manager to connect to your organization's LDAP or Active Directory.

## List of Directory Manager Plugins

- [LDAP Directory Manager](#)
- [Security Enhanced Directory Manager](#)
- [Sync LDAP User Directory Manager](#)

 **Important**

Once you have enabled a Directory Manager plugin, the built-in user management module will be disabled. (Sample org chart users (i.e. cat, clark) will no longer be able to login)
