Edit Form Grid

Edit Form Grid > UI > Validation & Data Binder

ID *

entries

Label

Form *

HR Expense Claim Entry

Columns

| FIELD ID * | LABEL | FORMAT TYPE | FORMAT | WIDTH | |
|-----------------|----------|-------------|--------|-------|-------------------------------------|
| date | Date | Text | | | <div></div> <div></div> <div></div> |
| category | Category | Text | | | <div></div> <div></div> <div></div> |
| purpose | Purpose | Text | | | <div></div> <div></div> <div></div> |
| formattedAmount | Amount | Text | | | <div></div> <div></div> <div></div> |

2. Construct the JSON object that correspond to the item row's form.

General Expense Entry

Category

name: category

Date *

YYYY-MM-DD

name: date

Purpose *

name: purpose

Amount *

name: fomattedAmount

Code

```
var args = new Object();
args['result'] = '{"amount":"1","category":"Medical","claim":"","purpose":"a","date":"11/18/2015","formattedAmount":"$ 1.00"}';
```

3. Based on the identifier in #1, call the FormGrid's add method to add a new row.

Code

```
// the field id is "entries"
var field = FormUtil.getField("entries");
var functionName = window[field.attr("id") + "_add"];
if(typeof functionName === 'function') {
    var args = new Object();
    args['result'] = '{"amount":"1","category":"Medical","claim":"","purpose":"a","date":"11/18/2015","formattedAmount":"$ 1.00"}';
    functionName(args);
}
```
