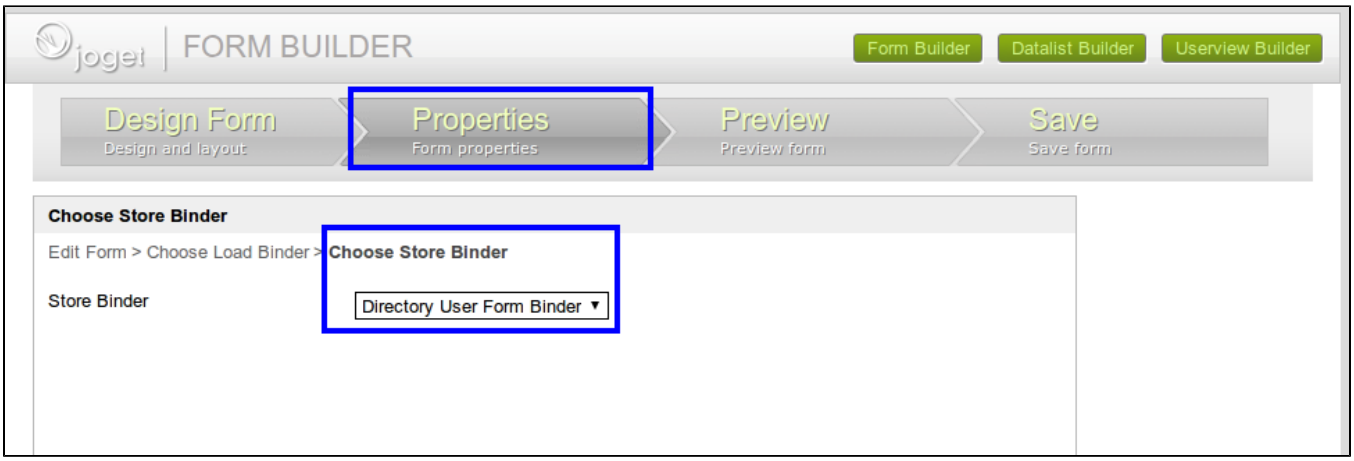
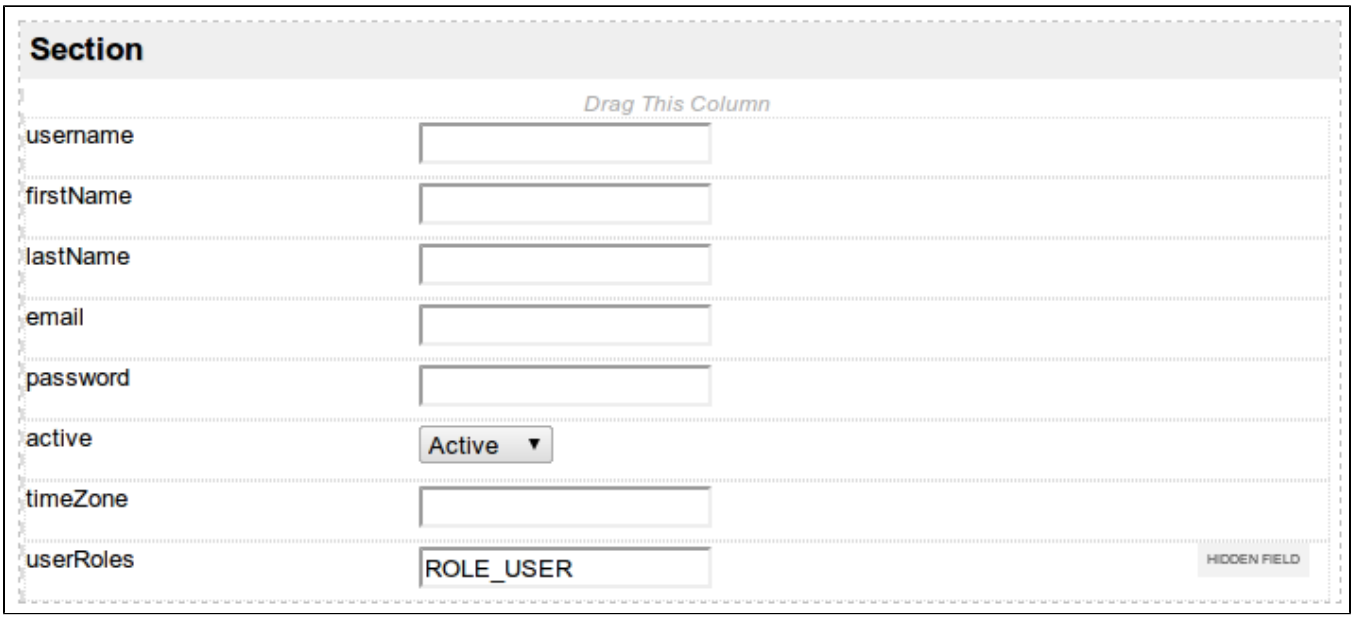
Directory User Form Binder

To create a user in the Joget Workflow user directory using a form created in Form Builder, set the Form Store Binder of a form to "Directory User Form Binder".



Design the form to capture user information as shown below:



Your form must contain the fields with the following field IDs:

No	Field ID	Note
1	id **OR** username	
2	firstName	
3	lastName	
4	email	
5	password	will be encrypted using MD5
6	active	Either '0' or '1' value, where '0' means inactive and '1' means active
7	timezone	In GMT format, e.g., '8' is the time zone for 'Kuala Lumpur' and '-6' for 'Mexico City'. This field is optional.
8	locale	User's preferred locale (e.g **zh_CN**) This field is optional.

9	userRoles	either 'ROLE_USER', 'ROLE_ADMIN', or 'ROLE_USER;ROLE_ADMIN' This field is mandatory.
10	groups	User's group IDs (e.g. **manager;admin**) This field is optional.
11	employeeCode	This field is optional.
12	jobTitle	This field is optional.
13	organization	User's organization ID. This field is optional.
14	department	User's department ID. This field is optional.
15	isHod	Either '0' or '1' value, where '0' means inactive and '1' means active This field is optional.
16	grade	This field is optional.
17	startDate	This field is optional.
18	endDate	This field is optional.
19	reportTo	User's report to user ID. This field is optional.
