

CheckBox

CheckBox enables one to make multiple selections. Its configuration is very similar to that of [SelectBox](#).

A screenshot of a web form titled "Proposal Form". Below the title bar, there is a section labeled "Channels". To the right of this label, there are two checkboxes: "Newsletter" and "Mail". Both checkboxes are currently unchecked.

Figure 1: CheckBox

A screenshot of the "Edit CheckBox" configuration window. The window has a title bar "Edit CheckBox" and a breadcrumb trail "Edit CheckBox > Choose Options Binder > Choose Validator > Workflow Variables".

The configuration fields are as follows:

- ID ***: A text input field containing "channels".
- Label**: A text input field containing "Channels".
- Value**: An empty text input field.
- Readonly**: A checkbox that is unchecked.
- Display field as Label when readonly?**: A checkbox that is unchecked.
- Options**: A table with three columns: "Value", "Label", and "Grouping".

Value	Label	Grouping
Newsletter	Newsletter	
Mail	Mail	

Below the table, there is a green plus icon (+) for adding new options. To the right of the table, there are three sets of control icons: an up arrow, a down arrow, and a red X icon, each in a circle.

Field ID to control available options based on Grouping: An empty text input field.
