 - O List
 - O Add
 - O Edit
 - O Advanced
 - O Performance & Offline

Introduction

With **CRUD**, one will not need to do all the manual wiring in constructing a CRUD entity.

This element provides a userview menu to show the datalist of your choice and selectable forms to associate with the datalist to perform CRUD operations.

CRUD Properties

Edit CRUD

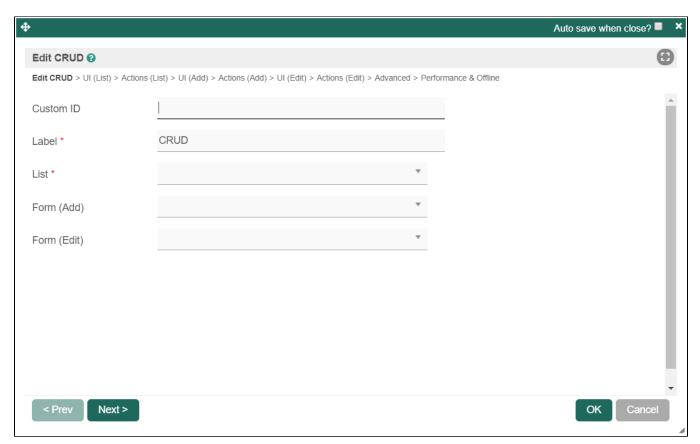

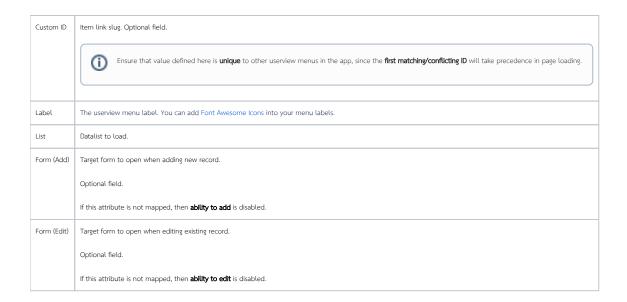

Figure 1: CRUD Properties

Name	Description
id	Menu element unique id. Userview will use this id in the URL for the menu if the Custom ID is empty.

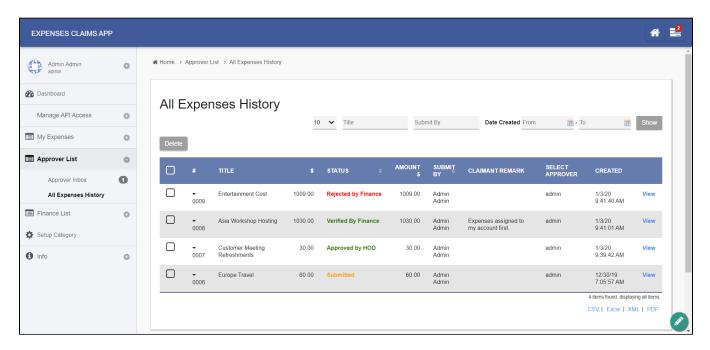

Figure 2: Sample CRUD in runtime

List

UI

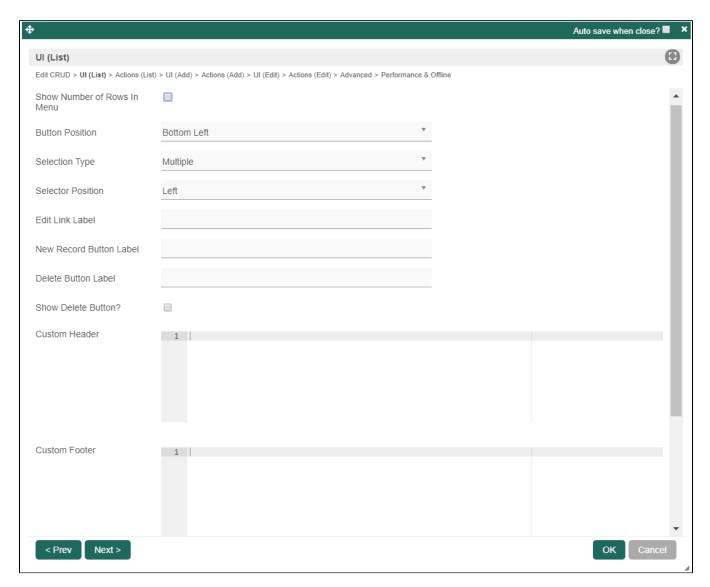

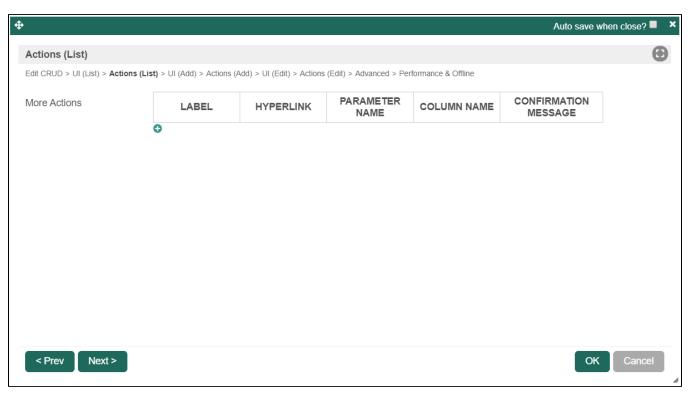

Figure 3: UI - List Properties

Description
Show number of rows beside this userview menu.
Additional query will be performed to return record count every time the userview loads.
Available options: • Top Left
Top Right
Bottom Left
Bottom Right
Top Left & Bottom Left
● Top Right & Bottom Right

Selection Type	Available options:
	Multiple Single
Selector Position	Available options:
	 Left Right Both let & right No
Edit Link Label	Edit link button label to show in listing.
New Record Button Label	New record button label to show in listing.
Delete Button Label	Delete button label to show in listing.
Show Delete Button?	When checked, the delete button will be shown, effectively enabling the deletion capability. If "Show Delete Button" is enabled, the following options will be shown:
	Delete Associated Grid Data?
	Delete Associated Child Form Data?
	Delete Files?
	Abort Related Running Processes?
	Read more in Delete Action.
Custom Header	Custom Header in HTML to show above the listing.
Custom Footer	Custom Footer in HTML to show below the listing.

Actions

	Only applicable when Action to perform after Form saved is set to Redirection .

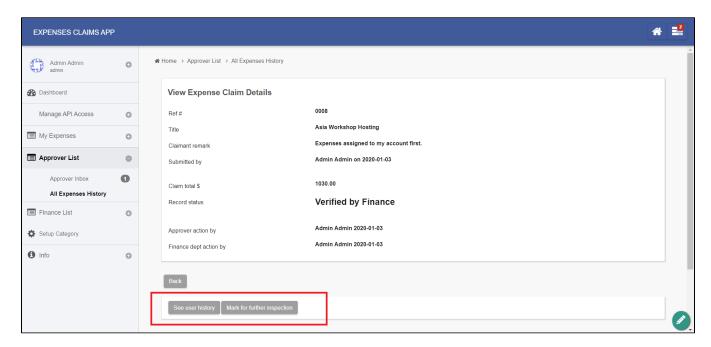

Figure 11: Sample Edit Actions in runtime

Advanced

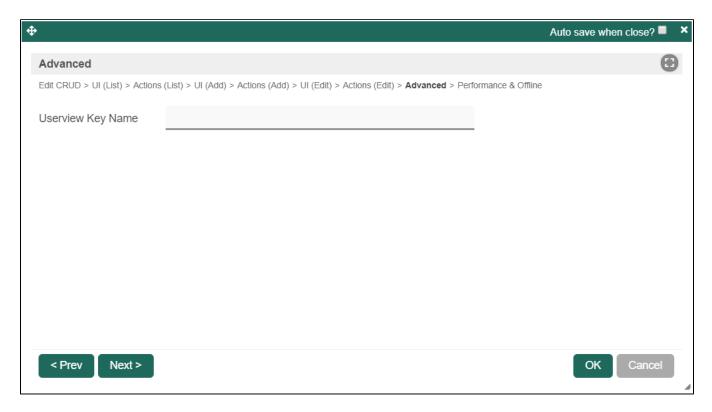

Figure 12: Advanced Properties

Name	Description
Userview Key Name	Define a column name to pre-filter the datalist via the userview key value.
	See Userview Key for more info.

Performance & Offline

Cache Settings

Name	Description
Scope	Caching options are: None: No caching. Application: Cache content by application where all users will see the same content. User: Cache by username.
Duration (s)	Duration in seconds to cache content, defaults to 20 seconds if applicable.

Read more at Performance Improvement with Userview Caching.

PWA Offline Settings

Note: PWA Offline support is dependent on the theme used.

Name	Description
Enable cache for offline support	Enable caching for offline support, usually set for use on mobile browsers.
Cache list actions (Non post action)	Enable caching for any non-POST list actions (if any) in the datalist.

Cache all datalist links in first page | Enable caching for any datalist links present in the first page of this userview menu.

Read Progressive Web Application (PWA) for more information.
